Beating of Nature

Concept
Here henceforth tourists to sightsee the downtown areas of Keelung will increase. Therefore our team decided to work on tourists who get on cruise to sightsee and people going about their daily chores. Such like people like to appreciate nature so we made a captivating city design. The area with the most captivating scenery is mainly occupied with roads so we introduced cartwheels and a transportation system that allows walking. We designed structures to enhance a city with a lot of fresh wind, tide, rain and green nature.

main street

Road line

Traffic node
Keelung station will be the transportation base in the city with a lay out of LRT. Here’s the 2 reasons why: firstly the city residents can use LRT to smoothly access Keelung station. Secondly, tourists can smoothly access the city’s sightseeing venues from Keelung station.

Tide
Centrifugal forces acting between the earth and celestial bodies cause the water level to fluctuate hence the occurrence of tide. So one can appreciate the rhythm of the earth just by watching the currents. The tide hotel’s height changes in regard to busyness.

Wind
Wind has a tremendous force! Because of wind, rocks turn into pebbles and from that can we make beautiful structures. These buildings are the reason why tourists from all over the world visit Keelung. Thanks to the winds flowing from various countries we presented about the buildings that make Keelung beautiful.

Green
We laid out a lot of green, green that symbolizes nature. We had two targets for that. One being we want to create an impression of city with a brim of nature for sightseeing tourists coming on trains. Secondly, through nature’s power for the residents taking a stroll to enjoy a soothing space formation.

Rain
When one walks in the rain one gets a stressful feeling. Therefore, we designed a city that allows movement without the use of umbrellas between Keelung station and the tourist center. Without the need to hold up an umbrella one can hear the sound of the rain pouring while relaxing and walking in the streets.
