

# A.I (All Including)

## Context

Yumeishima Island in Osaka is the island where the Osaka Expo will be held in 2025. We will solve the problems of Osaka city's environment and job market, and make Osaka a famous place after the expo.

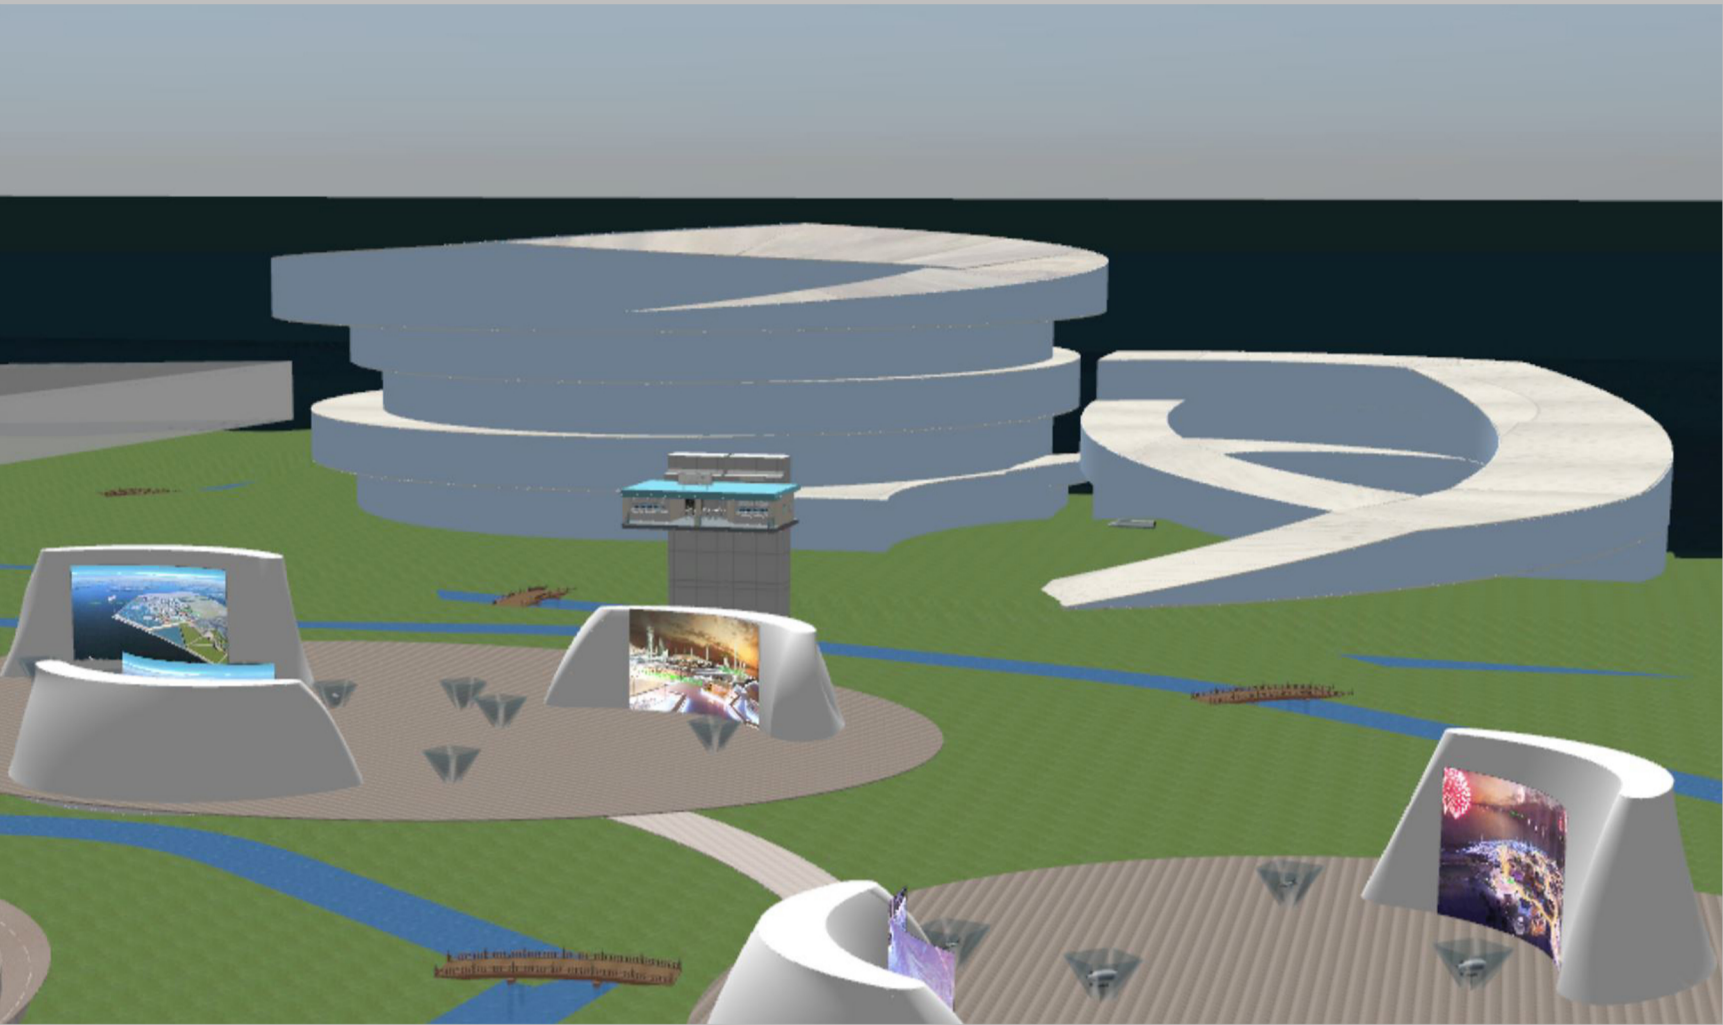

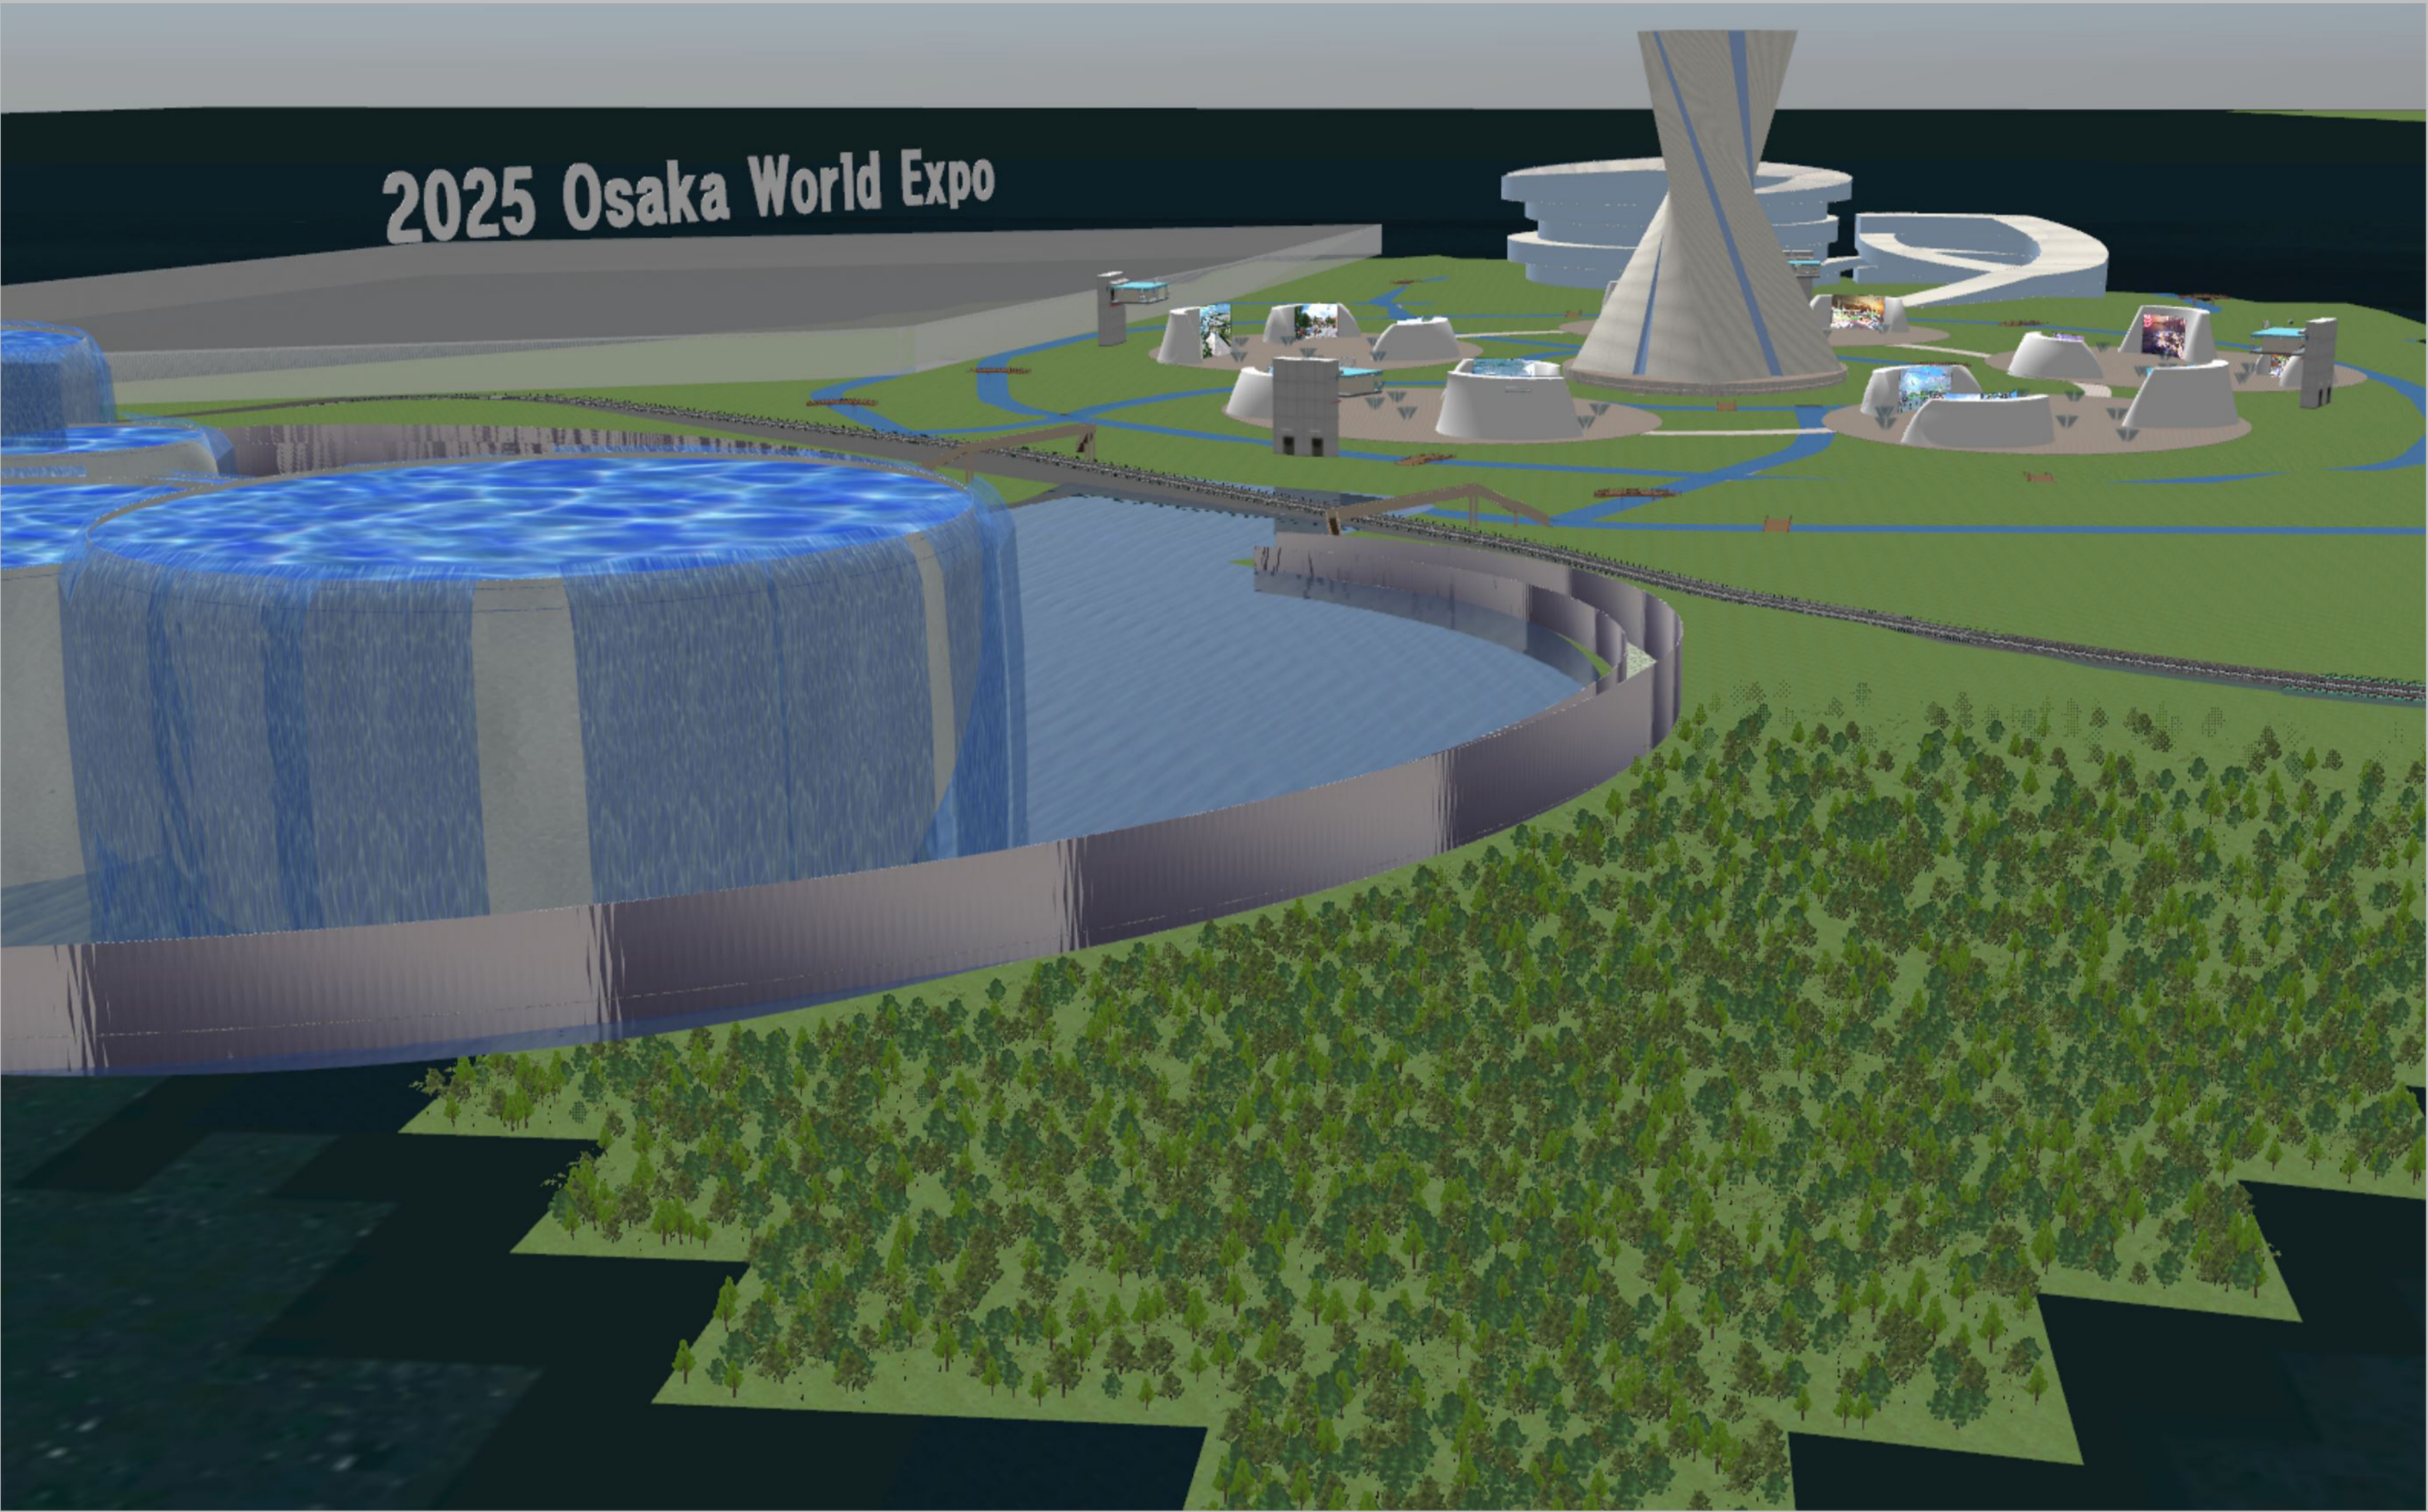

## Concept

A.I(all include) the many problems of Osaka City, its links to the global festival Osaka Expo, and the requirements of Forume 8. It wanted to create a future-oriented and world-class attraction along with solving problems. It was a space that included all the problems and requirements, and a space or dreams where all the imagined things were done.

## Process

First, resort hotels to attract family tourists and continue to make profits. Second, a future-oriented theme park that can take advantage of vr ar elements linked to the expo Third, water purification facilities that incorporate tourism factors in addition to environmental pollution resolution Finally, considering the means of transportation that organically links the three regions to the expo

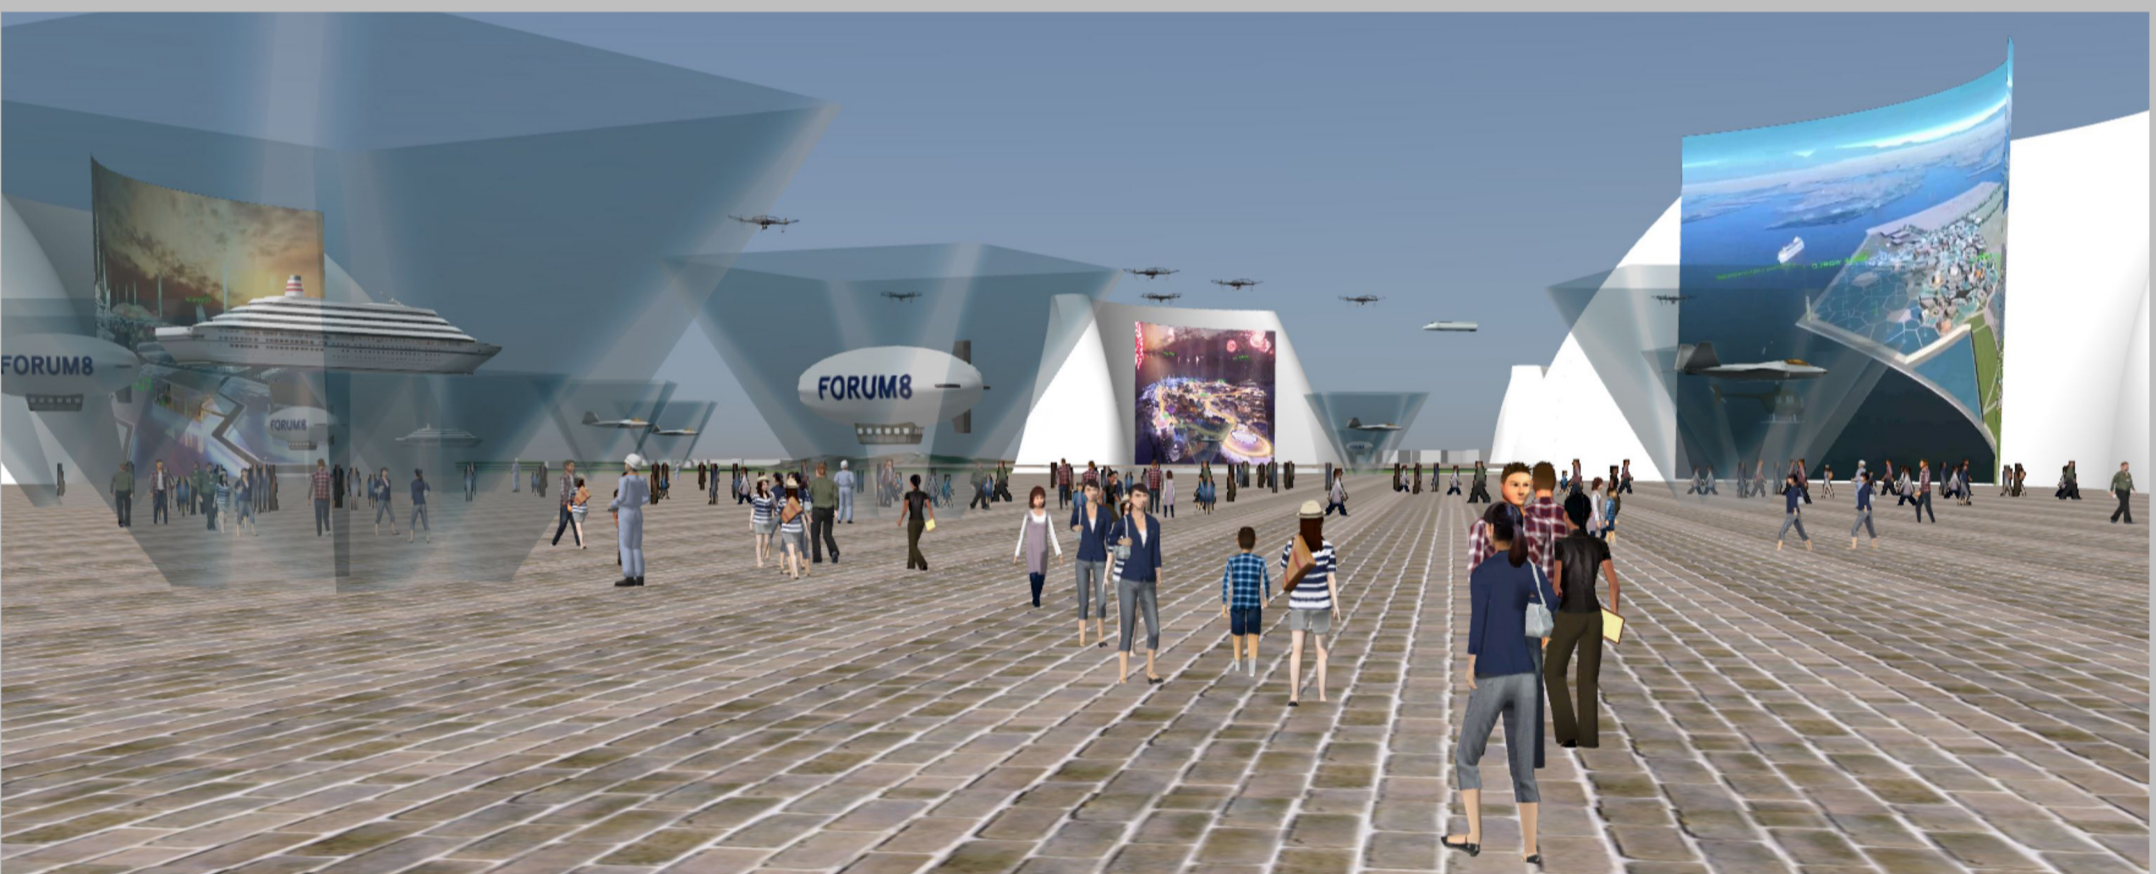

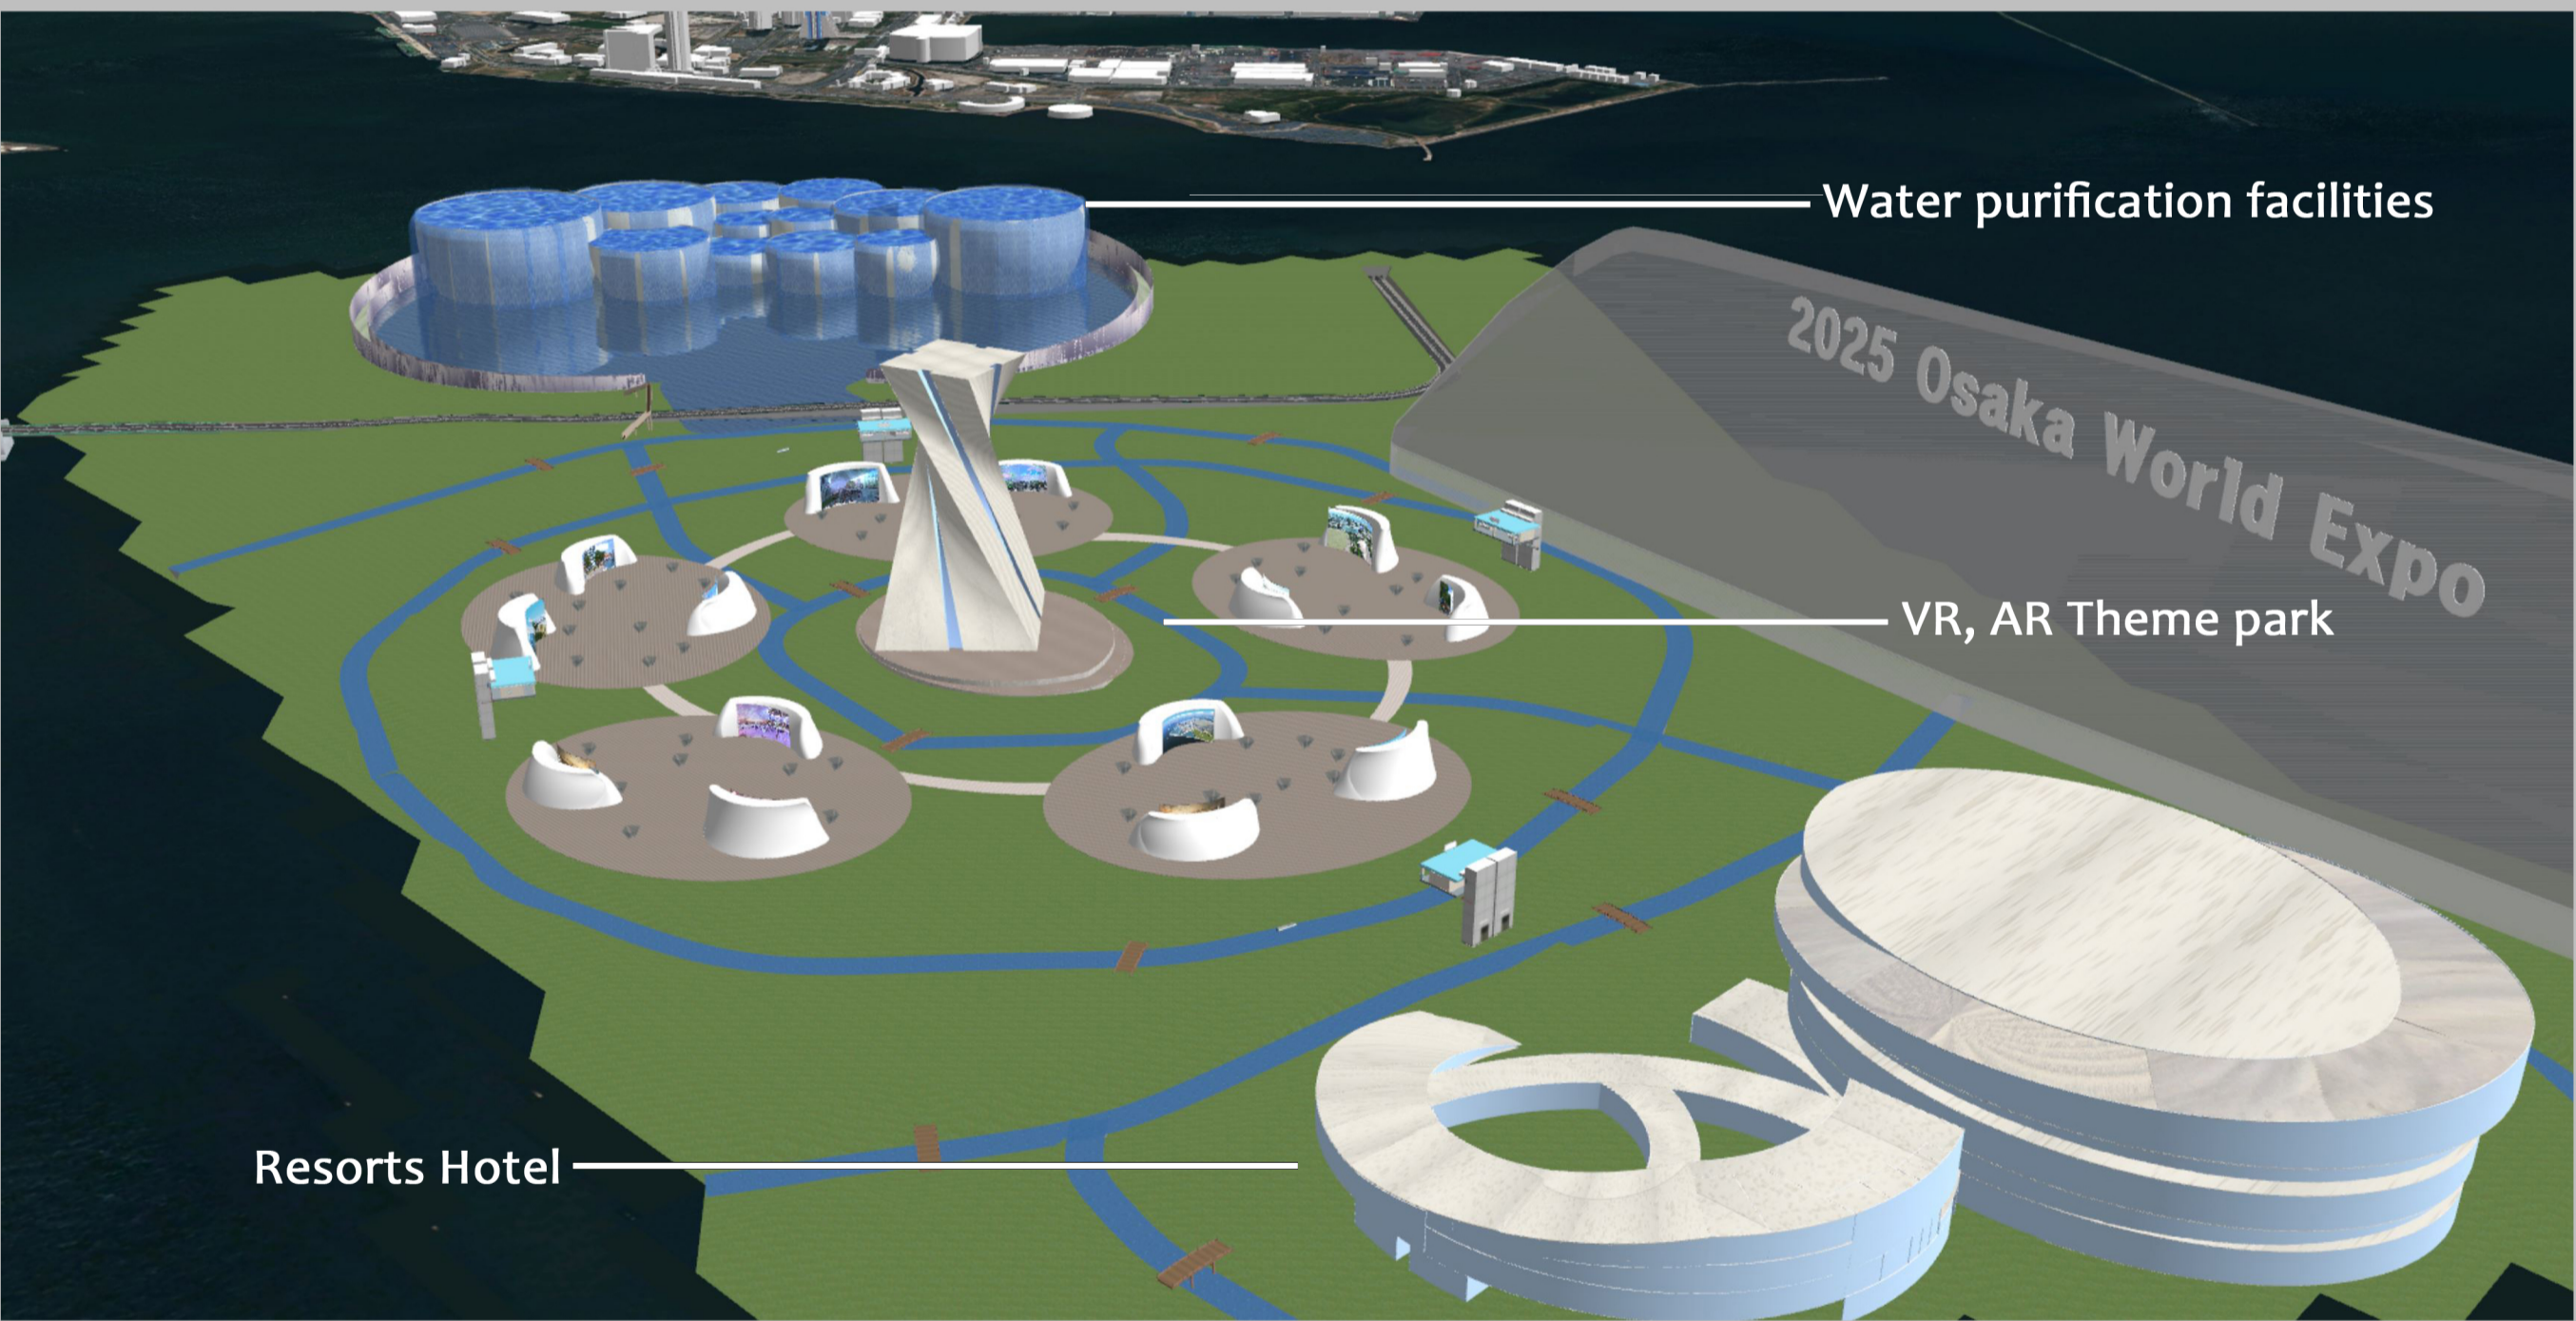

## Osaka citizens' complaints

1. Need to create sustainable jobs
2. Need to take precautions against water pollution in Osaka Bay
3. Need a new attraction after Osaka Expo
4. Future-oriented Osaka City's Development Direction linked to the Expo

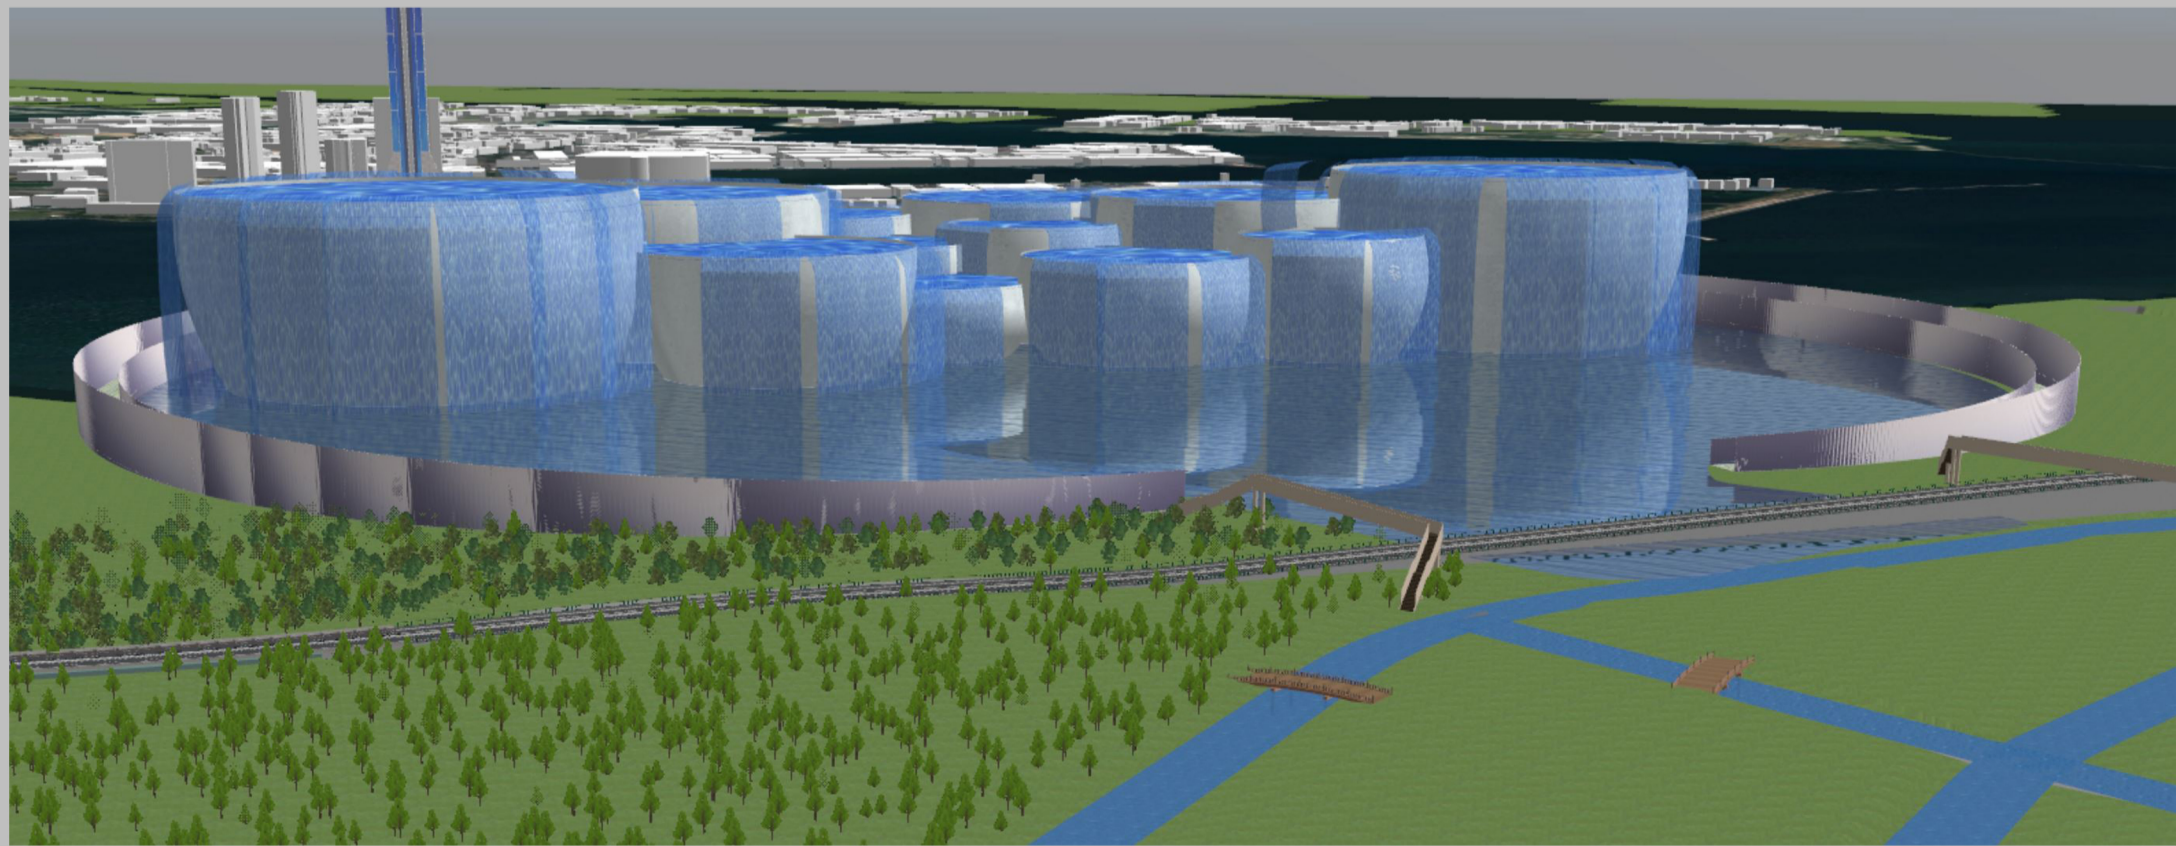

## Resolving the Complaints

Creating Sustainable Jobs and Osaka by Constructing Family-Based Resorts and We planned a theme resort on Yumesshima Island that will be reborn as a new city attraction. To solve the marine pollution in Osaka Bay, we planned a water purification facility. last We planned a theme park to help develop Osaka City, which will be the center of vr,ar.

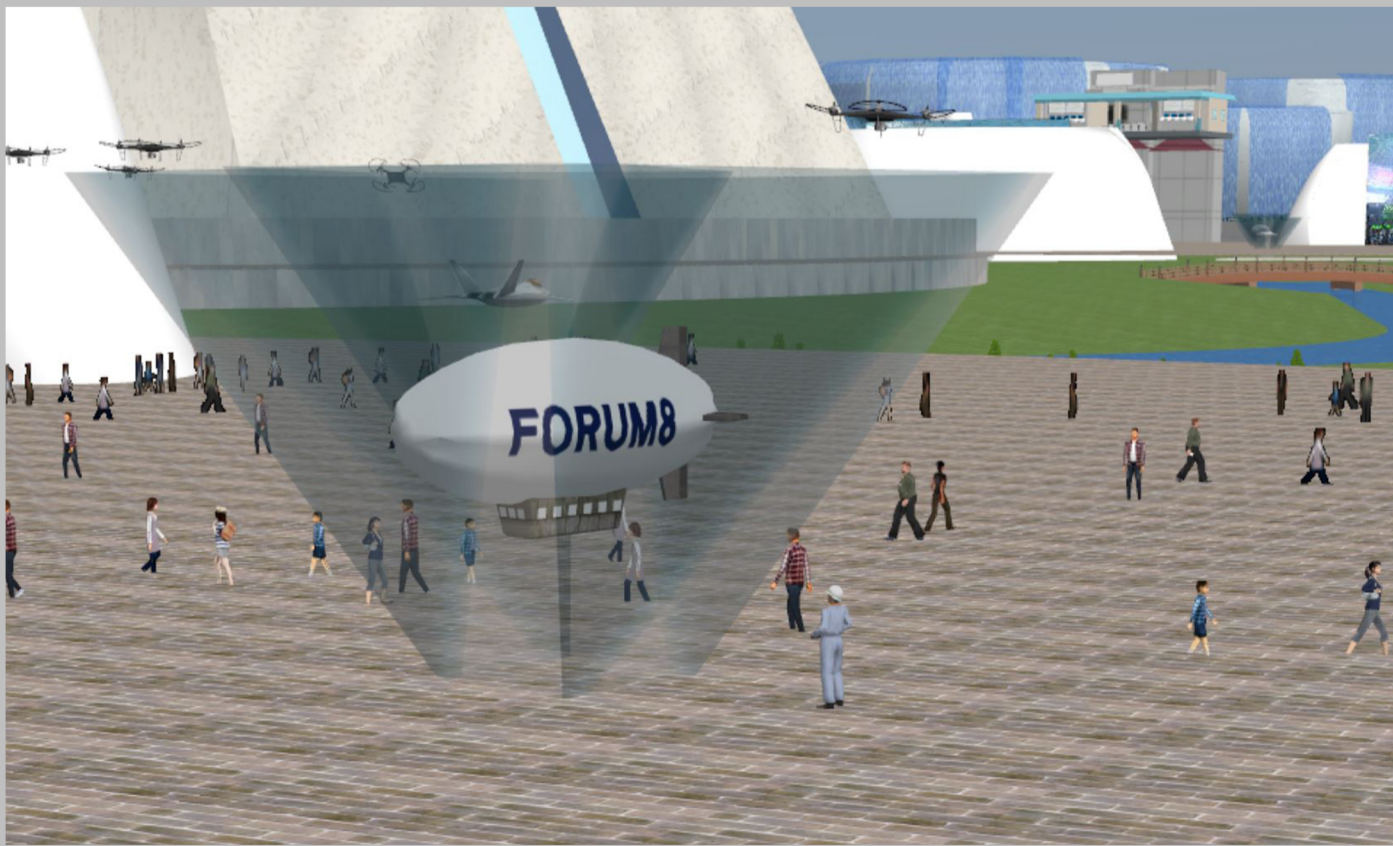

## Facilities Planning

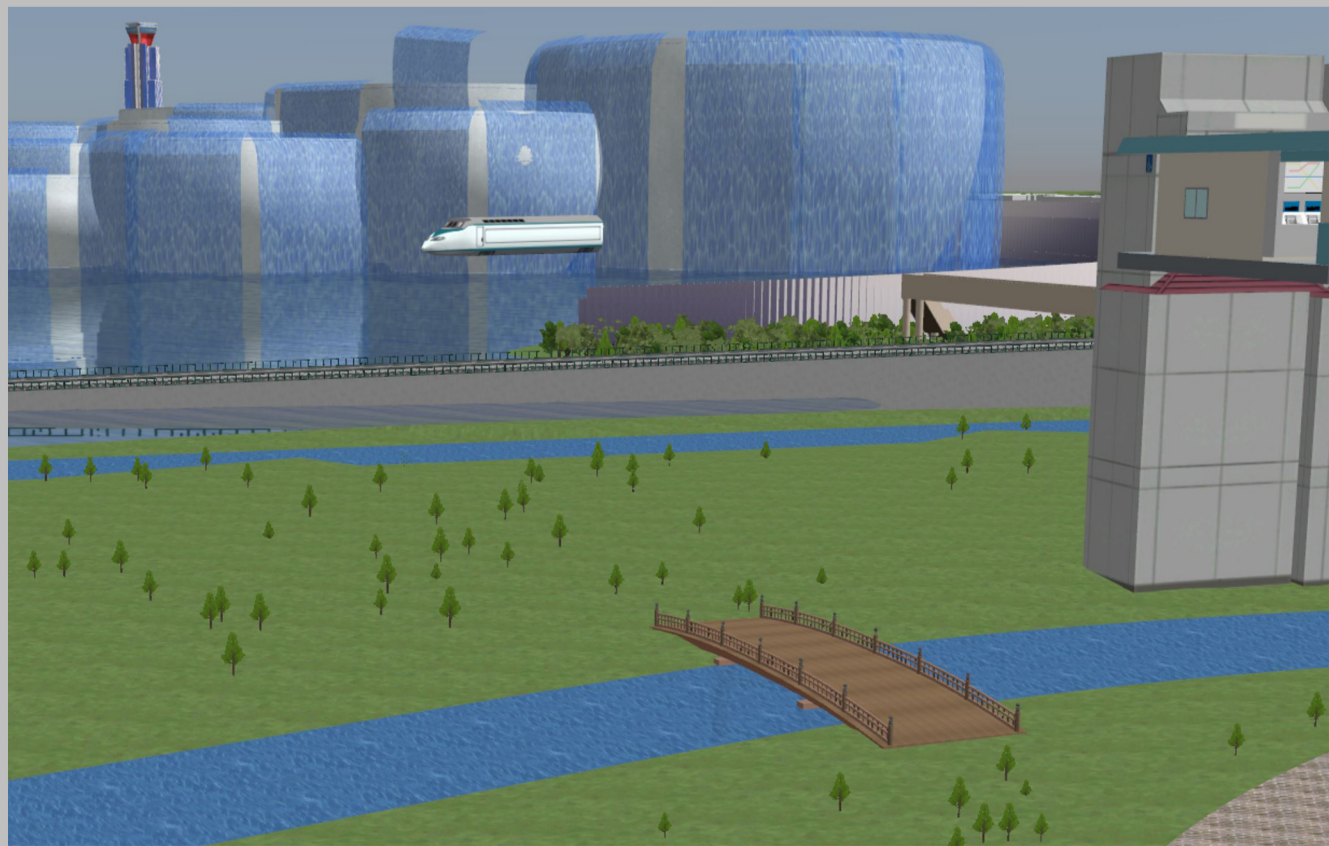

We used vr, ar, and technology not only in the expo but also in the theme park to decorate it with tourist elements. In addition, drone and hologram laboratories were placed around the center observatory, and magnetic levitation trains were planned to connect water purification facilities, resorts, expo and theme parks

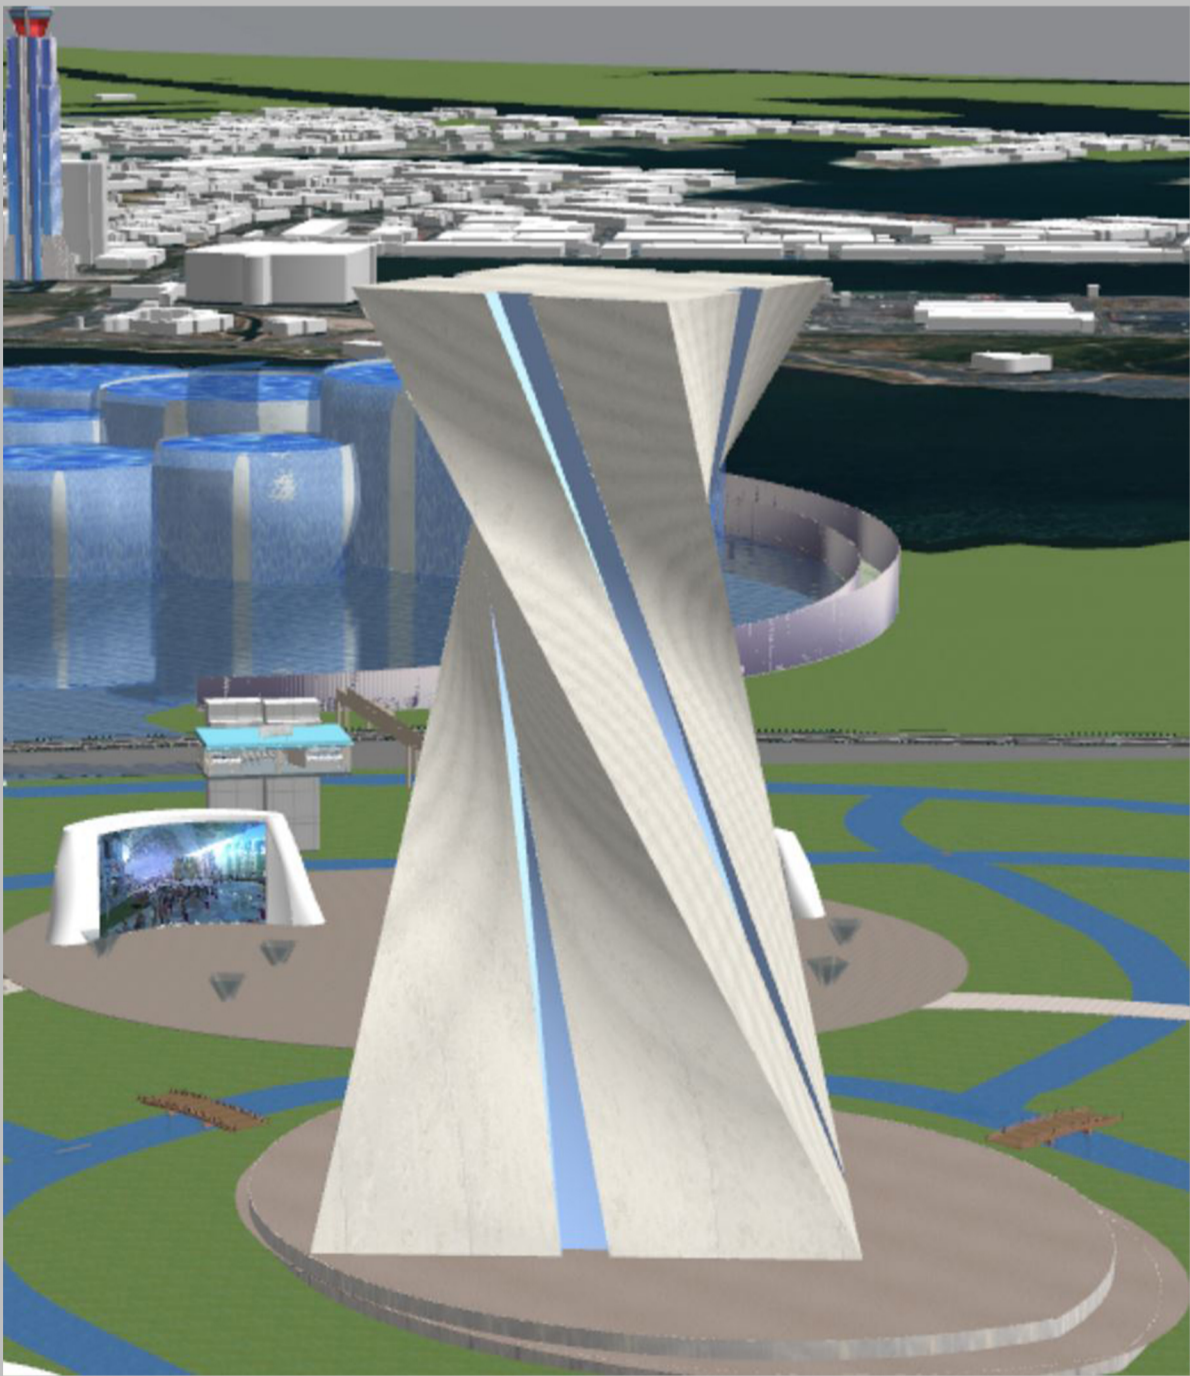

\* Water purification facilities

\* VR, AR, Hologram, Drone

\* Magnetic levitation train

\* Observatory
