

# Again, starting in Boston with AI Cylinder.

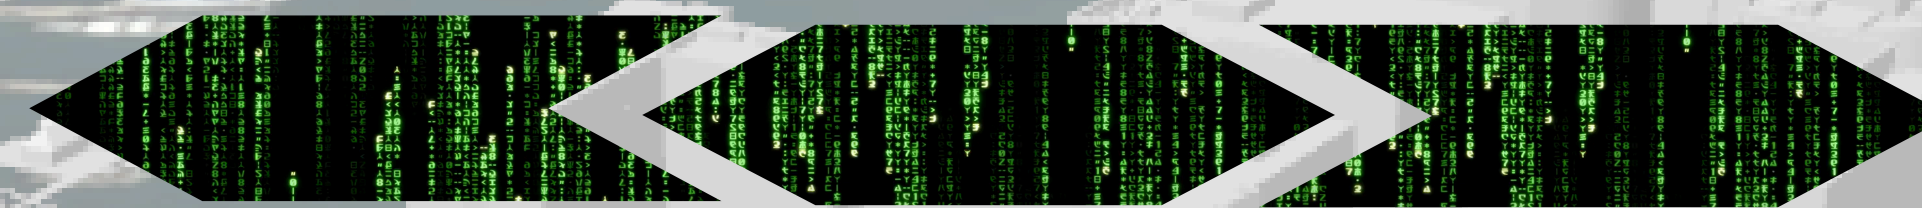

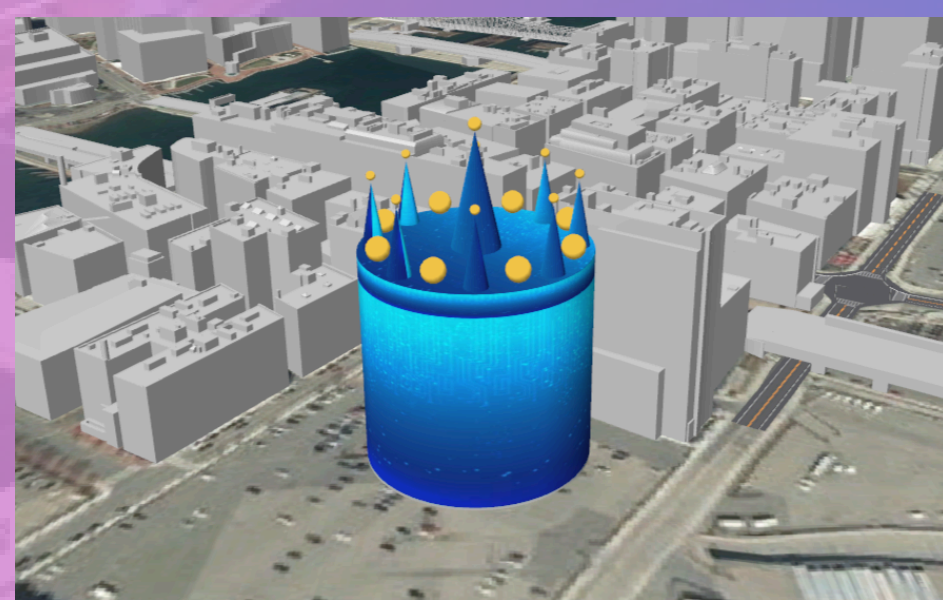

## Introduction

In the future, the world will develop multinationality and diversity, and various cultures will intermingle. And with the intermingling of various religions, there will be insufficient space to build houses of worship and churches. Furthermore, differences in eating habits, customs, and ways of thinking could cause trouble.

The time to live in harmony with NHAs is approaching. Therefore, a building will be built that can accommodate all the various religions and races that intermingle with each other. The name of this building is AI Cylinder.

## AI Cylinder

The building has an AI pastor, an AI itako, and the ability to offer offerings to broken robots. When people of various races and religions come to the building, the interior will change to suit them. AI Cylinder Lite will be installed in the city, and entering it will take you to your home base. A new history begins in Boston, a turning point in various histories.

## Object

Upon entering the AI Cylinder, you will see an object shaped like a cake with the following three actions to choose from.

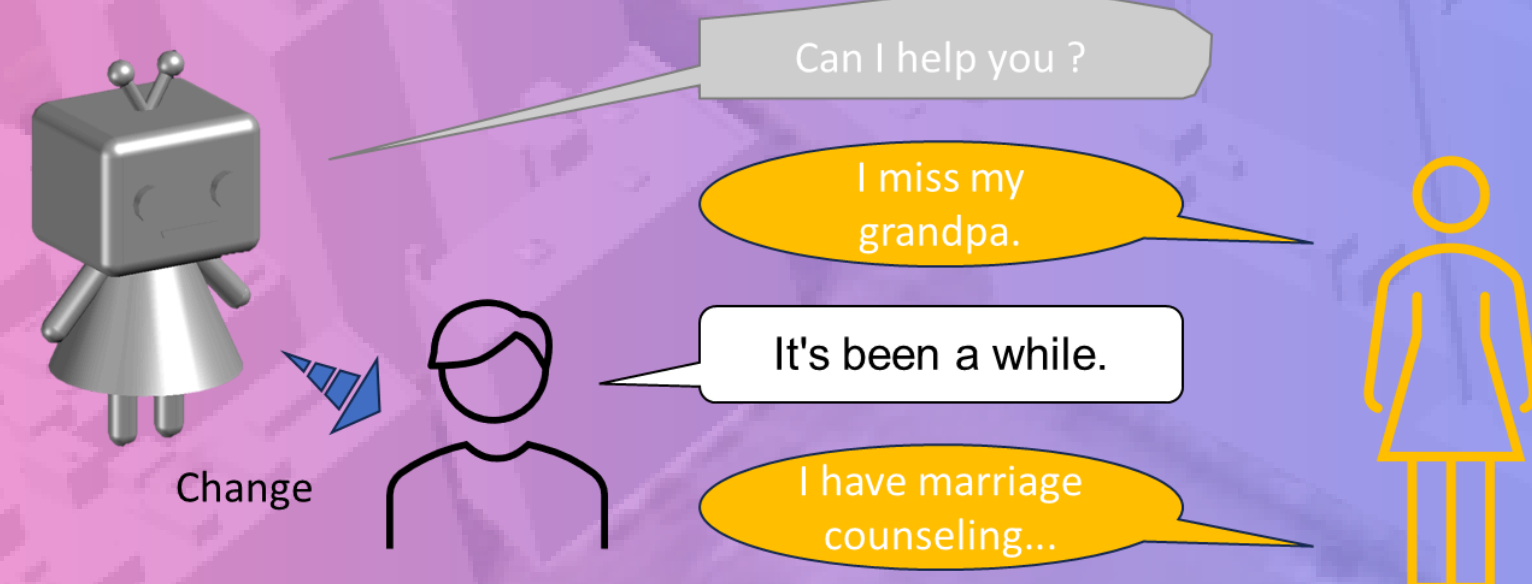

## AI Cylinder Lite

With so many people, getting to the site can be very difficult. Therefore, by riding AI Cylinder Lite, you can move quickly without congestion. Also, AI Cylinder is a large-scale building and it is very difficult to build all over the world. Since it is difficult to expand nationwide, Lite can be installed all over the world and can be moved from anywhere.

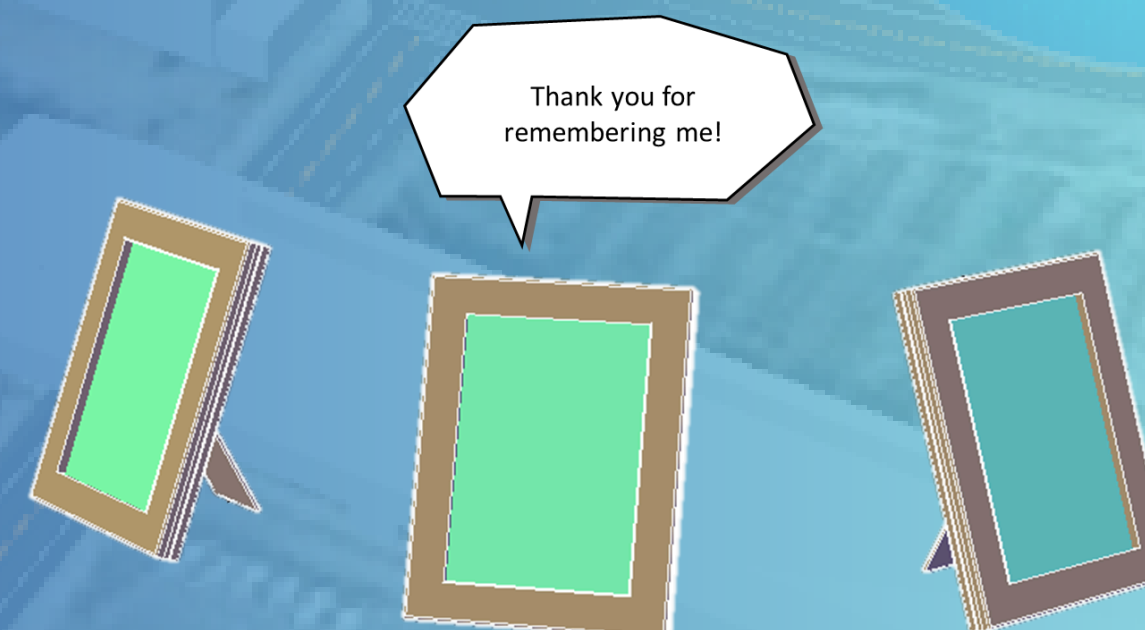

## AI ITAKO

AI Cylinder's AI robot can be a weasel. For example, a daughter comes to her deceased grandfather for marriage advice. Then, the AI Itako can revive her from the archive of the past, change into the form of her grandfather, and have a conversation with him. In this way, the archive connects the past with the future, and even if the speaker is a robot, the user can feel the warmth of talking to a person.

## Gratitude

In the symbiotic relationship between humans and NHAs, NHAs perform many tasks and can break down. Therefore, robots that have completed their tasks are prayed for. While the improvement of human life is important, we must also appreciate the efforts, hard work, and dedication of the robots. The happiness of the robot is also an important factor since it lives with humans.

## AI guru

—More than 80,000 scriptures have been read. First, people come to the church, God, and the Holy Land to pray. Then, based on the scriptures of the religion they each believe in, they are given a message that will help them solve their problems. They also organize and solve people's problems so as to avoid trouble between religions.

Thus, by bringing people of different races and religions together in AI Cylinder, we can unite where people aspire to be and resolve interreligious conflicts.

Thus, the era in which conflict will cease and humanity will be united will once again begin in Boston.
