

The 15th Virtual Design World Cup 2025

The Road to the Zoo
- Public Entertainment Promenade

TIME WALK WITH BEATS

DESIGN CONCEPT

Our design concept is built around the idea of immersive cultural exploration through virtual reality. Visitors and residents will wear VR headsets to experience unique animal-themed areas, each inspired by iconic Japanese creatures. The journey begins with specially designed tarot-style cards, where every card represents a symbolic animal. By selecting a card, users are transported into the corresponding environment, allowing them to engage with the cultural essence and symbolic meaning of each animal in an interactive and memorable way.

In the design for the Shiba area, our team chose the concept of an open playground that fosters connection. The Shiba symbolizes intimacy and companionship, reflecting its role as a familiar friend in Japanese daily life.

Koi fish has long been one of the most iconic and recognizable symbols of Japan. In the design of the Koi area, our team highlights its cultural significance, emphasizing its meaning of perseverance, prosperity, and good fortune.

Inspired by Japan's renowned Nara Park, where deer are regarded as both sacred and friendly, our team seeks to recreate this unique experience. The design emphasizes interaction, creating an open space where humans and deer can share moments of closeness."

VR-CLOUD

The crane is one of the most familiar symbols in Japanese culture, associated with longevity, good fortune, and grace. In the design of the Crane area, our team emphasizes the cultural symbolism of the crane, reflecting longevity, fortune, and grace in Japanese tradition.

This is the Rabbit's area, designed by our team based on the 'Tsuki no Usagi' legend in Japanese culture. The Rabbit, often associated with the moon and the legend of pounding mochi, creates a space that is familiar and mystical.
